

# MARY GATES ENDOWMENT FOR STUDENTS

The **CoMotion Mary Gates Innovation Scholars** program funds full-time summer internships in faculty-led start-up initiatives. Selected scholars will contribute to the development of these applications, gaining experience in and exposure to various aspects of building a new product/business. The participating research groups have projects at different stages of development; interns may be doing more basic research in some, or more marketing or business development in others. Scholarships are also open to international students and undocumented students.

**Students from all disciplines are encouraged to apply!**
