

DISCO XXVIII

Kailua-Kona, Hawai'i, 16-20 October 2022

The **28th Dissertations Symposium in Chemical Oceanography** (DISCO) for chemical oceanographers with recent PhDs will be held in Kailua-Kona, Hawai'i from

16-20 October 2022. This symposium will be jointly sponsored by the National Science Foundation and National Oceanic and Atmospheric Administration, and coordinated by the University of Hawai'i.

The DISCO symposium provides recent PhD graduates, or soon to graduate, chemical oceanographers with an opportunity to present their dissertation research in front of their peers and to forge professional relationships with program managers that will facilitate their future research and academic careers.

Applicant Information: Applications received by **22 April 2022** will be reviewed by a screening committee and invitations issued by **mid-June 2020**. Participation in the DISCO symposium is by invitation only to applicants who have completed a dissertation concerning an important problem in ocean chemistry. Dissertations must have been completed after **30 June 2021**, or applicants must provide certification from their Department Chair or Dean that they will complete their degree by **1 July 2023**.

Applications and further information about the symposium can be obtained from:
