Biology Hydroponics Projects

June 12 & 13th, 2023

The 9th grade biology classes at Federal Way High School are preparing presentations as the culmination to a hydroponics unit. Students will be presenting information from their research, and justifying their answer to the question, “How can hydroponics improve our current food system? “

To create a more authentic experience for our students we are asking for guests to come observe their presentations. They will be presenting exhibition style, with a 10 minute presentation prepared and a few minutes for transitioning from one project to the next. You will rotate through and see at least five presentations in the 90 minute presentation window.

We have several 9th grade biology classes so the presentations will be spread out at different times over two days. I am asking for people to commit to judging one class of presentations (a 90 minute time slot); although if you can do more that would be great! The start times for each presentation window are as follows:

date	start time of 90 minute time slot	Class info
Monday June 12th	7:30am	Per 1 (1 class) Egaas
	9:30am	Per 3 (1 class) Jolley
	10:45 am	Per 5 (1 class) Jolley
	12:40pm	Per 7 (1 class) Egaas
Tuesday June 13th	7:30am	Per 2 (1 class) Egaas
	9:30am	Per 4 (1 class) Jolley
	10:45 am	Per 6 (2 classes) Egaas, Jolley
	12:40pm	Per 8 (2 classes) Egaas & Jolley

Please Come Join Us !

Thank you,
Federal Way High School Biology Teachers
