

LUNCH-AND-LEARN EVENT: HAZARDS, HUMAN BEHAVIOR, AND HEALTH

Tuesday, May 21 | 12-1 p.m. | HRC 101

In this talk, Dr. Joe Wartman will explore the connections between geological hazards, human behavior, and health impacts. His research group combines field data and eyewitness accounts from natural hazards to understand how event magnitude, human exposure, and protective actions influence survivability. The goal is to provide evidence-based insights for informing risk reduction policies.

Joe Wartman
Director, RAPID Facility;
Professor of Civil & Env. Engineering

Please RSVP to let us know you'll be joining.
Lunch provided!
