

# CALL FOR ABSTRACTS

# PALEOCLIMATE FOR SUSTAINABLE WATER STRATEGIES

Where: PAGES 7th Open Science Meeting  
Shanghai, China

---

Our session invites submissions that address the following themes:

- Paleohydrology and paleoclimatology of major river basins and lake systems
- Reconstruction of hydrological extremes (e.g., floods, droughts) and their societal impacts
- Paleoclimate reconstructions from sediment and other lacustrine and riverine records
- Integration of paleoclimate data with hydrological and/or climate models for improving future projections
- Proxy system models or other forms of proxy/model comparison for rivers and lakes

We highly encourage submissions focused on human activities and water systems, exploring their impacts on cultural heritage, agriculture, industry, and beyond, while advocating for ethical research protocols and fostering partnerships with indigenous and local communities

---

Registration and Abstract Submission  
August 1, 2024 - December 1, 2024
